## Right n' Ready

From Passenger to Partner:

Making a difference in the right-hand seat

Independence Aviation LLC offers classes every 6–8 weeks to help your non-pilot partner understand basic piloting. The class helps the non-pilot understand how an airplane flies, how to help the Pilot In Command with cockpit management and duties, and what to do in the case of an emergency.

Each participant will fly for about an hour in one of our flight simulators (simulator flight time will occur right after class, or within a week after the class at the student's convenience).

For more information or to reserve a seat, contact Independence Aviation at 303-858-1600 or email us at [groundschoools@flywithia.com](mailto:groundschoools@flywithia.com). Visit us online at [www.flywithia.com](http://www.flywithia.com).

### Subjects to be covered

- Understanding conventional and glass flight instruments
- Using multi-function displays
- Setting communication and navigation frequencies including talking on the radio
- Understanding visual and instrument charts to help the Pilot In Command
- Taking a classroom cross country to help understand what all the symbols and colors mean

Independence Aviation
